## **PUTTING COMMUNITY DEVELOPMENT INTO COMMUNITY SAFETY**

The national outcomes agreed by the Scottish Government and COSLA include:

- We live our lives safe from crime, disorder and danger, *but also*:
- We have strong, resilient and supportive communities where people take responsibility for their own actions and how they affect others.

Much good work has been done to build community safety partnerships and community engagement in safety issues. But can community development make a more fundamental contribution to enhancing people's safety and perceptions of safety? This conference looks at how we can foster the ability of communities to:

- Help people to look out for each other and their safety
- Tackle problems that lie at the root of disorder and other threats to safety
- Reach out to and integrate vulnerable groups
- Have the confidence to understand the safety issues that they face in an accurate and proportionate way.
